

Add Wheels to Your Line Trimmer

Look What They're Saying!

"This will take the back-ache out of my yard work ..."

— Jean Taylor, home owner

"We'll put these on all our line trimmers."

— Todd Davis, lawn care professional

"What a great idea! It will keep the trimmer from scalping my Lawn."

— Terry Myers, Green Industries Expo attendee

The light weight Trimmer Trolley mounts on the shaft (straight or curved) of most gas line trimmers. Quick release levers on dual universal joints, allow the trolley shaft to pivot and rotate to virtually any position and angle as the wheels support and balance the line trimmer. Users can adjust the Trimmer Trolley to mow or trim, edge, with much more ease and precision. The trolley head can also be released and allowed to caster, making the process of clearing or use with blowers almost effortless. Trimmer Trolley will not interfere with line feed functions and at just over a pound, can quickly be set into a "store" position for other operations
